SOFTWARE DEVELOPMENT

Looking for a great career? Axon Software has openings in their Software Development department!

We are looking for intelligent, motivated and professional individuals who are looking for a career as a member of our highly-energetic and fast-growing Software Development team. This is a challenging but very rewarding position that involves a range of skills, knowledge and willingness to learn the transportation industry, software development, and general accounting using best-practise programming skills and techniques.

JOIN THE AXON SOFTWARE FAMILY

Founded in 1982 Axon Software has established itself as a trusted and leading transportation management system serving thousands of users in the most unique and complex trucking industries across North America. We're a professional and committed group of individuals with the same company-wide mission that operates on its core values and forward-thinking philosophy of developing superior software and delivering world-class customer service to the transportation software industry. We believe in building customer relationships that pass the test of time with trucking software you can count on and people you can trust. As a company driven by innovation, development and support, we see our employees as the most important resource in achieving that success and offer a variety of positions from support, training, sales, administration and software development.

RESPONSIBILITIES

Programming at Axon Software is done using Suneido, an open-source integrated application program, in conjunction with cloud services like S3, EC2, and SQS. We work primarily in Windows with some occasional use of Linux. We follow agile and lean techniques such as pair programming, automated testing, refactoring, and continuous delivery. You will have opportunities to work on everything from gathering requirements, to UX design, to automated deployment systems for the best customer user experience possible.

- Work in close collaboration with sales, support, training and other senior programming staff to improve and develop Axon Software features and user experience by responding to customer suggestions and industry advancements.
- Assist in the resolution of customer questions, suggestions and software issues with strong problem-solving skills and draw on the expertise and experience of senior programming specialists to find solutions in an accurate and timely manner for our clients.
- Monitor customer data integrity, security and nightly checks, and assist in any emergency data recovery protocols that may occur to keep our customers operation up and running smoothly.

QUALIFICATIONS

Preferred applicants will have 1 or more of the following:

- A post-secondary education – diploma or degree in computer science, computer programming, software system developer, web programming or any related field of study that gives you the ability to program.
- 'Show us what you've got' – past experience or a passion for programming code with strong written, verbal and time management skills.
- Experience with accounting, transportation or computer software programs – QuickBooks, Simply Accounting, Accpac, Excel.

We have numerous employees at Axon Software that have been with us for over 15+ years. We pride ourselves in having an extremely high employee retention rate and this is an exciting opportunity that could lead to a long-lasting and successful career with us. We would like to sincerely thank all applicants, but only those selected for an interview will be contacted.

To Apply: Please send cover letter and resume to careers@axonsoft.com with the subject: **Axon Software – Software Development**.

WORK ENVIRONMENT

- Axon Software is location at 15 Innovation Blvd #210, Saskatoon, Saskatchewan, Canada S7N 2X8 in the heart of the University of Saskatchewan campus and technology sector.
